Dear Izolda,

Your presentation on the importance of water given to our 6<sup>th</sup> graders was absolutely wonderful! I was simply amazed at how you were able to teach an interactive lesson with our entire group of 6<sup>th</sup> grade classes and keep them interested and engaged in the learning!

Our students learned quite a bit about water and how important it is to life in your presentation. I was pleased to see how you referred to the drought in South Africa. This current event helps our students to connect the information taught to actual events in life. Having a real world connection is very important to our students being able to understand the concepts that we teach.

Finally, your outreach effort requesting that our students contribute to the local food bank added a community connection component to your presentation. Our students felt honored to be able to do some good for someone else.

This was a great lesson for our students and also a fun one. Bert the Nerd was quite entertaining and helped make the lesson a lot of fun! As a part of the Oxon Hill Middle School family you are always welcomed to return and share your wealth of knowledge with our students. Thanks again!

Sincerely,

Ava Martin  
STEM Coordinator
